

# HOW TO ENCOURAGE STUDENTS TO CHEAT LESS?

Together with students from eight schools in Kaunas and Vilnius county, we had discussions about honesty and offered for students to sign a pledge of integrity during assignments.

## WHAT DID WE LEARN?

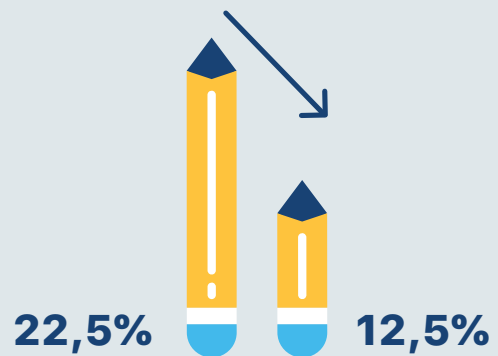

1.

**A quarter fewer students cheated at least once a week** after the discussions about honesty.

2.

**Two times fewer students supported cheating classmates** after they pledged not to cheat during the assignments and talked about honesty.

3.

**Discussions and integrity pledges reduced students' willingness to cheat.** After the initiative, four times fewer girls and two times fewer boys considered cheating.

This is the pledge that was used for the experiment
